

EZ-SGI, the Smart LPG System

Easy Installing, EZ Calibrating!

EZ-SGI

EZ-SGI is a break-through for the LPG industry and the key to convert vehicles to LPG without cost consuming development projects. EZ-SGI is developed out of the highly successful AG Autogas SGI System and is a tool to convert vehicles to a sophisticated sequential LPG injection system, even though there is no existing calibration available.

By utilizing state of the art software technology, EZ-SGI is able to deliver outstanding performance and emissions results with a simple to use calibration tool provided to dealers and distributors.

How it works

1. Install EZ-SGI System software to a laptop.
2. Connect the laptop to the EZ-SGI ECM.
3. Enter in general settings regarding the base vehicle.
4. Test drive to create the unique calibration.

Simple and EZ!
